HKICO

Hong Kong International Computational Olympiad

2026 - 2027

What is HKICO?

It is an annual international programming competition that covers Scratch, Blockly, and Python programming languages. It promotes computational thinking through problem-solving, algorithm design, decomposition, pattern recognition, and abstraction.
It has an optional programming project that allows participants to share their programming knowledge through a 5-minute video presentation. where Medalists are invited to Singapore for **STEM** education programs and academic exchange with students from different regions.

HKICO Objectives:

To promote computational thinking and problem-solving skills among students worldwide.

To encourage learning and application of informatics concepts such as decomposition, abstraction, pattern recognition, and algorithm design.

- To provide an international platform for students to showcase programming skills in various languages.
- To foster academic exchange and collaboration through competitions and educational programs.
