Contest Bag

SIMSO SCIENCE

Siam International Math and Science Olympiad

2026 - 2027

What is SIMSO Science?

It is an international competition in Science for students in grades 3 to 12. It aims to promote excellence and proficiency in Science through friendly global competitions. With the participation of partner countries across Asia, Europe, Africa, and the Americas, SIMSO fosters global competitiveness and sets high standards in academic excellence.

SIMSO Science Objectives:

Promote Excellence & Proficiency

Encourage top performance and deep understanding in math and science via friendly competitions.

Cultivate Global Competitiveness

Help students engage, compare, and excel on an international stage.

Set Educational Standards

Inspire sustainable excellence and best practices in STEM education across participating countries.

General Information:

- **National Round Format:** Online from home, under remote proctoring.
- **Content:** General school syllabus.
- **Test Language:** English.
- **Global Round:** Thailand.

Test Information:

Levels	Grades	Questions (MCQ)	Duration (Mins)	Points
Middle and Upper Primary	Grade 3 - 6	30	75	5 points for each correct answer
Secondary Levels	Grade 7 - 10			
Senior Secondary Level	Grade 11 - 12			

Note: Each grade will get their own set of questions..

Competition Stages:

Scoring Criteria:

Award	Score
Gold Medal	Top 8%
Silver Medal	Next 12%
Bronze Medal	Next 20%
Achiever Medal	Remaining Participants (in Top 60%)
Lower 40% of the participants	
Merit Certificate	Upper 50%
Participation Certificate	Lower 50%

Prizes:

The top three winners will receive **medals and special prizes**, as well as a discount on the **Global Round participation fee**, as follows:

🥇 **First Place:** 60% discount
🥈 **Second Place:** 50% discount
🥉 **Third Place:** 40% discount

⏱️ **In the event of a tie, priority will be given to the participant who completes the competition in the shortest time.**

The discount applies exclusively to the Global Round participation fee and does not cover any additional costs or expenses, such as airfare or accommodation or visa fees etc.

Competition Preparation and Practice Materials:

The **curriculum specified for each competition** is the primary resource participants should use to prepare, along with the practice materials provided by the competition to help them become familiar with the nature and format of the questions. Participants are also encouraged to consult other relevant educational resources, such as their school textbooks, to strengthen their understanding and preparation.

The practice materials can be accessed through the **official forum:**
https://contestbag.com/forum

Registration:

Registration is available through the Contest Bag website:
https://contestbag.com/

Contest Timeline:

Registration Close	Apr 17, 2027	
Apr 24, 2027	**National Round**	
Global Finals	Aug, 2027	

*Global Round dates are subject to change.

Registration Fees:

Round	Fees
National	SR 245

Syllabus:

Level	Subject Domain	Content
Lower Primary Level / Elementary G3	Life Sciences	• living and nonliving things; • senses; basic human anatomy; • basic plant structure; • parts of the eye, ear, nose, mouth; the skin; • animals; • life stages and development; • introduction to ecology.
	Physical Sciences: Chemistry	• materials used in everyday life; • properties and intended uses of matter; • phases and changes in matter; • measurements; food and household products.
	Physical Sciences: Physics	• force and motion; • light and color; • speed; and simple machines
	Earth and Environmental Sciences	• weather and climate; seasons; • direction of shadows; • clouds; rocks; wind system, water, and air; • food chain and food webs; • weathering and erosion; farming methods; • land forms and water forms; • properties and layers of the earth; • natural phenomena and hazards.
	Space Sciences	• Earth-moon system; • Earth-moon-Sun system; • phases of the moon; • the Sun and the planets; • comets, meteors, and asteroids.

Syllabus:

Level	Subject Domain	Content
Upper Primary Levels / Elementary G4-G6	Life Sciences	• human organ systems • puberty and health; • ecological relationships; • levels of organization; • basic animal taxonomy; • basic plant taxonomy; • basic cell biology; • how to stop the spread of Covid-19; • keeping oneself healthy during a pandemic.
	Physical Sciences: Chemistry	• phases and states of matter; • physical and chemical properties of matter; • physical and chemical changes in matter; • basic atomic theory; • solutions; measurements; energy and matter
	Physical Sciences: Physics	• units and measurements; • force and motion; • forms of energy; • velocity and acceleration; • light and color; • speed; sound; gravity; • heat transfer
	Earth and Environmental Sciences	• soil, rocks, and minerals; • land and water forms; • climate change; • water cycle; • climate change and global warming; • fossil fuels; pollution; wildlife extinction
	Space Sciences	• Solar System; the Earth in the solar system; • beyond the Solar System; • the Milky Way and its neighboring galaxies; • the constellations; • the relative sizes of the planets, stars, and galaxies; • measuring distances in the solar system and beyond

Syllabus:

Level	Subject Domain	Content
Junior High School Levels / Secondary G7-G9	Life Sciences	• cell biology; microscopy; • human and animal organ systems; • plant tissue systems; bioenergetics; ecology; • evolution; genetics; bacteria and archaea; • animal taxonomy; plant taxonomy; • new vaccine technologies against SARS-COV2, HIV, etc.
	Physical Sciences: Chemistry	• structure of matter; • phases and properties of matter; • atomic theory; chemical bonding and intramolecular forces; • gas laws; chemical reactions; stoichiometry; • thermochemistry; solution chemistry.
	Physical Sciences: Physics	• kinematics; Newton's Laws of motion; • work, energy and power; gravity; periodic motion; • wave mechanics; thermodynamics; electromagnetism; • light and color; introductory quantum mechanics.
	Physical Sciences: Materials Science	Materials Science.
	Earth and Environmental Sciences	• origin and structure of the earth; • plate tectonics; earth materials and processes; • natural hazards, mitigation, and adaptation; • history of the earth; geology, minerals and energy; • the scientific method; ecology; the biosphere; • lithosphere; climate, hydrosphere and atmosphere; • population; the land, forests and soil; • water resources and water pollution; • energy and resources; societies and policy; • sustainability and the human endeavor; • waste management; climate change and global warming; • fossil fuels; pollution; wildlife extinction.
	Space Sciences	• comparing planets and stars; star systems; • the stars and the galaxies; formation of the universe; • the universe; space explorations (US, USSR, China, India); the ISS; planetology; • Mars explorations; Mars rovers; Kepler's planetary laws; • Newton's three laws of motion; Newton's gravitation; • Ptolemaic Aristotelian vs Copernican vs Newtonian models of the universe; • 21st century space explorations (SpaceX and Elon Musk, colonizing and terraforming Mars; • China's 2023 Space Station and 2021 Mars rover).

Syllabus:

Level	Subject Domain	Content
Senior High School Levels / Secondary G10-G12	Life Sciences	• central dogma of molecular biology; • biomolecules; omics; cancer biology; • genetic diseases; microbiology and pathogenic diseases; • epidemiology; genetic engineering; • molecular tools; biotechnology; biophysics; • bioinformatics; paleobiology; • CRISPR; new vaccine technology against SARS-COV2, HIV, etc.
	Physical Sciences: Chemistry	• atomic and molecular structure; • chemical bonding and intermolecular forces; • chemical reactions and stoichiometry; • quantum chemistry; chemical analysis; • analytical techniques; organic structures; biochemistry.
	Physical Sciences: Physics	• kinematics; wave mechanics; • quantum mechanics; • statistical thermodynamics; • optics and photosciences; relativity.
	Physical Sciences: Materials Science, Nanoscience, and Nanotechnology	• Materials Science, • Nanoscience, and Nanotechnology.
	Earth and Environmental Sciences	• wind system; lithosphere; hydrosphere; • global warming; atmospheric processes; • climate change and global warming; fossil fuels; • microplastics; wildlife extinction.
	Space Sciences	• the Big Bang; black holes; gravitational waves; • particle physics and the early universe; • Einstein's general theory of relativity; • quantum mechanics; Quantum Chromodynamics (QCD); astrophysics; galactic paleontology; • galactic archeology; space microbiology; space geology; • space medicine (orbital medicine, aerospace medicine, emergency medical procedures in space); • 20th-21st century astronomy; 21st century space explorations (SpaceX and Elon Musk, colonizing and terraforming Mars; China's 2023 Space Station and 2021 Mars rover).
