TIMO

TURKIC INTERNATIONAL MATHEMATICAL OLYMPIAD

2026 - 2027

TURKIC INTERNATIONAL
MATHEMATICAL OLYMPIAD

TURKIC INTERNATIONAL MATHEMATICAL OLYMPIAD

What is TIMO?

The Olympiad aims to bring together young people from different cultures through a platform of mathematical and scientific excellence. It focuses on developing critical thinking, problem-solving, and teamwork skills, while promoting cultural and intellectual exchange. The Olympiad seeks to raise educational standards globally, provide a competitive environment that fosters collaboration and respect among cultures, and support students academically through partnerships with prestigious universities, contributing to the advancement of education and science and creating a positive impact on young people's lives both locally and internationally.

Mission

Strengthen the math skills of students by discovering and expanding scientific and cultural exchanges between different nations.

Vision

To create an Olympiad aimed at excellence in education and knowledge, leading students to success in mathematics, thereby contributing to the personal and academic development of the young generations.

TURKIC INTERNATIONAL MATHEMATICAL OLYMPIAD

General Information:

- **Preliminary Round Format:** Online from home, under remote proctoring.
- **Content:** General school math syllabus.
- **Test Language:** English.
- **Global Round:** Istanbul, Turkey

Test Information:

Grades	Questions (MCQ)	Duration (mins)	Points
Grade 3 To Grade 10	25	90	Correct +4, Wrong –1, Blank 0; maximum 100.
Grade 11 & Grade 12 **(SS Category)**			

Note: Each grade will get their own set of questions..

Competition Stages:

TURKIC INTERNATIONAL MATHEMATICAL OLYMPIAD

Scoring Criteria:

Award	Score
Gold Medal	91–100
Silver Medal	75–90
Bronze Medal	50–74
Honorable Mention	40–49
Participation Certificate	1 - 39

Prizes:

The **first-place winner in each grade** will receive a **medal and a special prize**, in addition to a **60% discount** on the Global Round participation fee.

⏱️ **In the event of a tie, priority will be given to the participant who completes the competition in the shortest time.**

The discount applies exclusively to the Global Round participation fee and does not cover any additional costs or expenses, such as airfare, accommodation, visa fees, or any other related expenses.

REGISTER NOW!

Competition Preparation and Practice Materials:

The **curriculum specified for each competition** is the primary resource participants should use to prepare, along with the practice materials provided by the competition to help them become familiar with the nature and format of the questions. Participants are also encouraged to consult other relevant educational resources, such as their school textbooks, to strengthen their understanding and preparation.

The practice materials can be accessed through the **official forum:**
https://contestbag.com/forum

Registration:

Registration is available through the Contest Bag website:
https://contestbag.com/

Contest Timeline:

Registration Close — Apr 10, 2027

Apr 17, 2027 — **Preliminary Round**

Global Finals — Jul 02, 2027

*Global Round dates are subject to change.

Registration Fees:

Round	Fees
Preliminary	SR 245

TURKIC INTERNATIONAL MATHEMATICAL OLYMPIAD

Syllabus:

Grade 3	Grade 4
• Calculation of the perimeter of a rectangular square prism • Numerical logic • Four operation • Numerical logic problems, • Setting up equations • Operations on natural numbers • Defining a new operation • Pattern problems • Verbal logic problems • Counting problems (combinatorics)	• Calculation of the perimeter and the area of rectangles, squares and triangles • Numerical logic problems • The four operations problems • Numerical logic problems • Setting up equations • Ratio, proportion and fraction problems • Operations on natural numbers • Defining new operation • Pattern problems • Verbal logic problems • Counting problems (combinatorics)
Grade 5	**Grade 6**
• Calculation of the perimeter and the area of rectangles and squares • Numerical logic problems • The four operations problems • Setting up equations • Number problems and fraction problems • Ratio, proportion, and fraction problems • Operations on decimal and fractional numbers • Operations on natural numbers • Defining a new operation • Pattern problems • Verbal logic problems • Counting problems (combinatorics)	• Calculation of the perimeter and the area of rectangles, squares, and triangles • Numerical logic questions • Four operation problems • Setting up equations, numbers, and fraction problems • Ratio, proportion, and fraction problems • Operations on decimal and fractional numbers • Operations on natural numbers • Defining a new operation • Pattern problems • Verbal logic problems • Counting problems (combinatorics) • Exponentials • Sets • Division and divisibility

TURKIC INTERNATIONAL MATHEMATICAL OLYMPIAD

Syllabus:

Grade 7	Grade 8
• Calculation of the perimeter and the area of rectangles, squares, and prisms • Numerical logic questions • Operations on fractional numbers • Operations on natural numbers and problems • Defining a new operation • Pattern problems • Verbal logic problems • Counting problems • Setting up equations • Motion problems, profit and loss problems • Division and divisibility • Counting problems (combinatorics)	• Exponentials and radicals • Calculation of the perimeter and the area of rectangles, squares, and triangles • Counting problems (combinatorics), • Factorials • Defining a new operation • Pattern problems • Basic concepts • Numerical logic problems • Verbal logic problems • Setting up equations, number problems
Grade 9	**Grade 10**
• Prime divisors of an integer, number of divisors, sum, and product of divisors • Rational numbers • Cube coloring • Perimeter and area relations on quadrilaterals. • Percentage problems • Non-routine problems • Counting problems • • Division on natural numbers and divisibility problems • Sets and probability • Relations of length in triangles • Factorization and identities • Number problems and motion problems	• Prime divisors of an integer, number of divisors, sum, and product of divisors • Rational numbers • Cube coloring • Perimeter and area relations on quadrilaterals. • Percentage problems • Non-routine problems • Counting problems • Division on natural numbers and divisibility problems • Sets and probability • Relations of length and area in triangles • Factorization and identities • Number problems and motion problems • Polinomials • Binomial expansion • Functions

TURKIC INTERNATIONAL MATHEMATICAL OLYMPIAD

Syllabus:

Grade 11 and 12
• Prime divisors of an integer, number of divisors, sum, and product of divisors • Rational numbers • Cube coloring • Perimeter and area relations on quadrilaterals. • Percentage problems • Non-routine problems • Counting problems • Division on natural numbers and divisibility problems • Sets and probability • Relations of length and area in triangles • Factorization and identities • Number problems and motion problems • Analytical geometry • Trigonometry • The angle, length, and area relations in circles • Polinomials • Sequences
